RM FORUM, now in its 14th edition, is the Conference/Exhibition dedicated to topics related to the development of new products or their re-engineering from a generative perspective, with the support of **Additive Technologies** integrated into the production process. The event focuses particularly on the following sectors: **Aerospace, Energy, Oil & Gas, Automotive, Racing, Furniture, Medical, Dental, and Technical Components.**

THE TARGET

RM FORUM is aimed at: technical directors and production managers of companies producing durable consumer goods, designers, heads of design and engineering firms, service managers, entrepreneurs, and managers of companies interested in introducing Additive Technologies into their production processes.
